

## Simone Pheulpin turns 80!

Today, we are celebrating a very special event – **Simone Pheulpin's 80th birthday!**

Simone is an immensely talented artist who, for almost 50 years, has invented and reinvented her own one-of-a-kind techniques, her singular esthetics, and her poetical and timeless universe.

**Happy birthday, Simone!**

2021 is also a particular year for **Simone Pheulpin** – it was very important for us to pay homage to her by publishing an **art book** about her work. It will release via Editions Cercle d'Art.

As a wonderful gift, the **MAD-Museum of Decorative Arts in Paris** has organized a **stroll-like solo show for Simone**, to be exhibited at the end of the year within the museum's permanent collections!

A word from **Florence-Guillier Bernard**, founder and director of galerie maison parisienne.

*"I met Simone for the first time in 2008, right before the very first exhibition of my gallery. It was love at first, I felt immediately moved by her art and by her. She is a wonderful person with an incomparable talent. I first showed her works in the Hotel Plaza Athénée in Paris, and the very first artwork that I sold was one of her creations. I became her agent, and then her friend. I am very proud and very happy to support her, represent her work, and follow her career from this close. Simone, I wish you many happy returns!"*
